Milestone 3

**Loom Video Link:** <https://www.loom.com/share/6b41891d25c44f50bec59460631d01ea?sid=a13a69c5-a385-44ce-bfa3-950716102791>

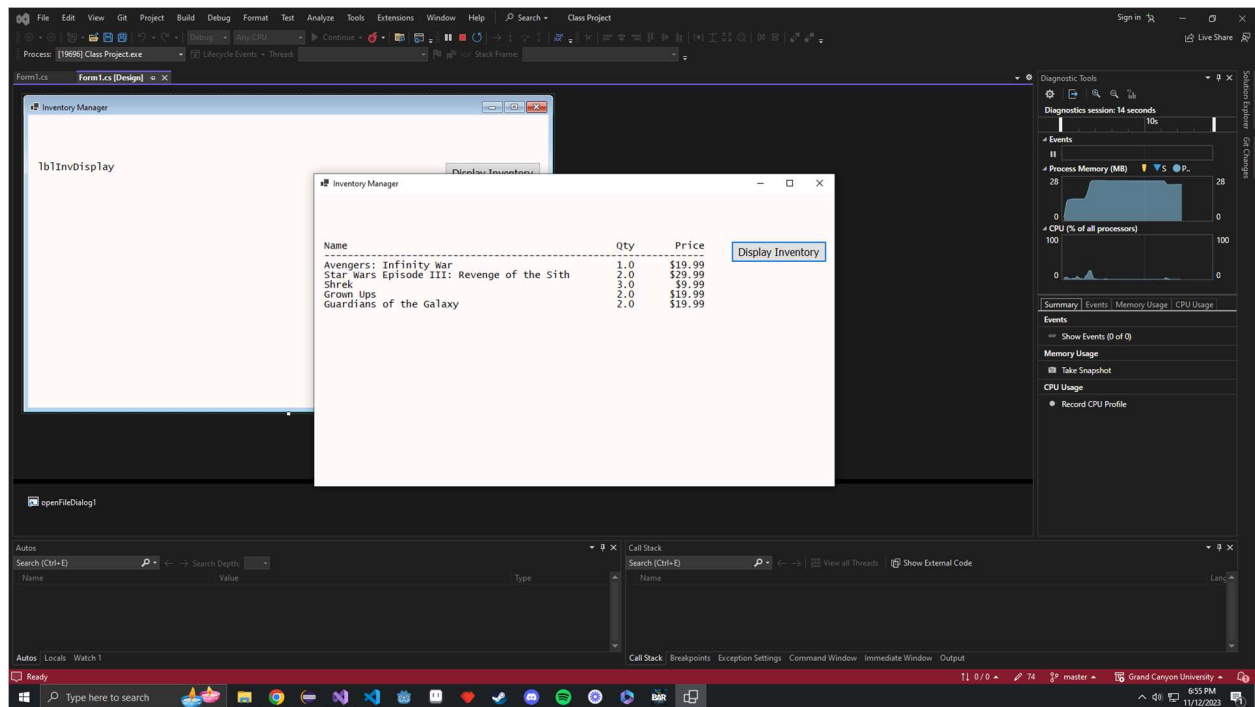

\*Note: On Milestones Two's video, I forgot you can't use embedded links on PDFs. So, lesson learned haha

## Flowchart Screenshot

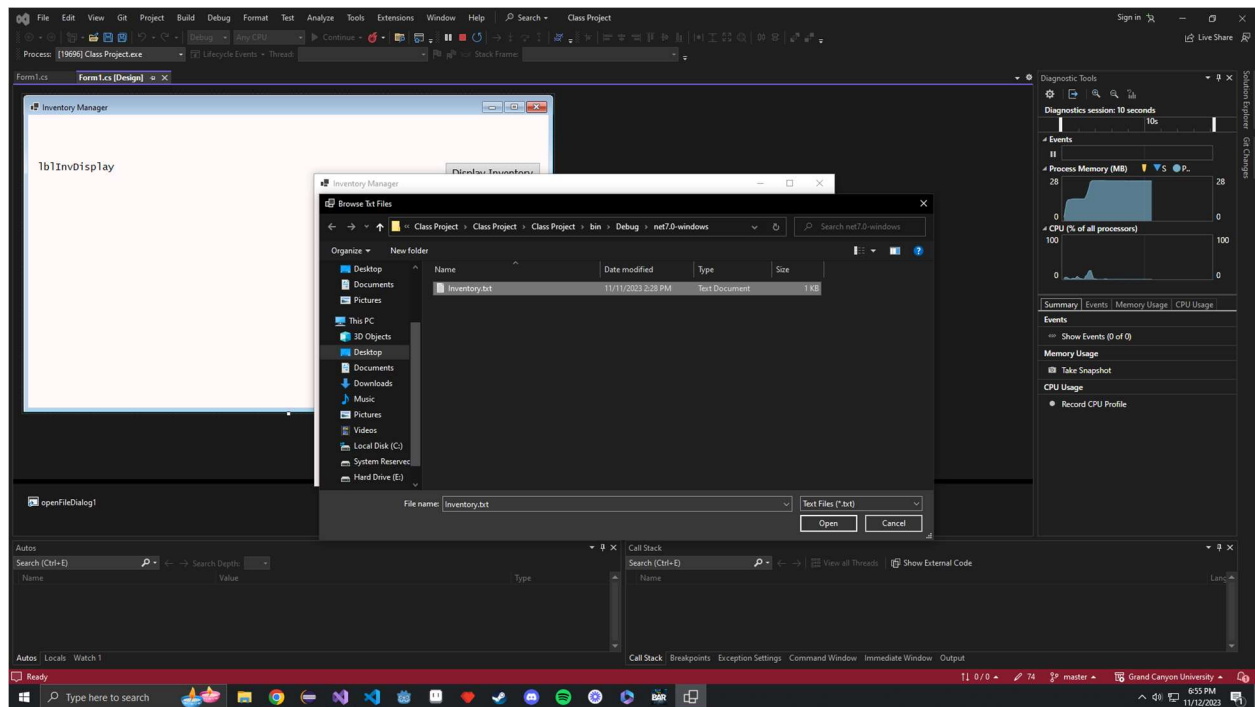

Just has the single button flow for milestone 3. Did not include the file selection dialog as a step, but it all falls under the Display Products.

## Program Display/Output Screenshot

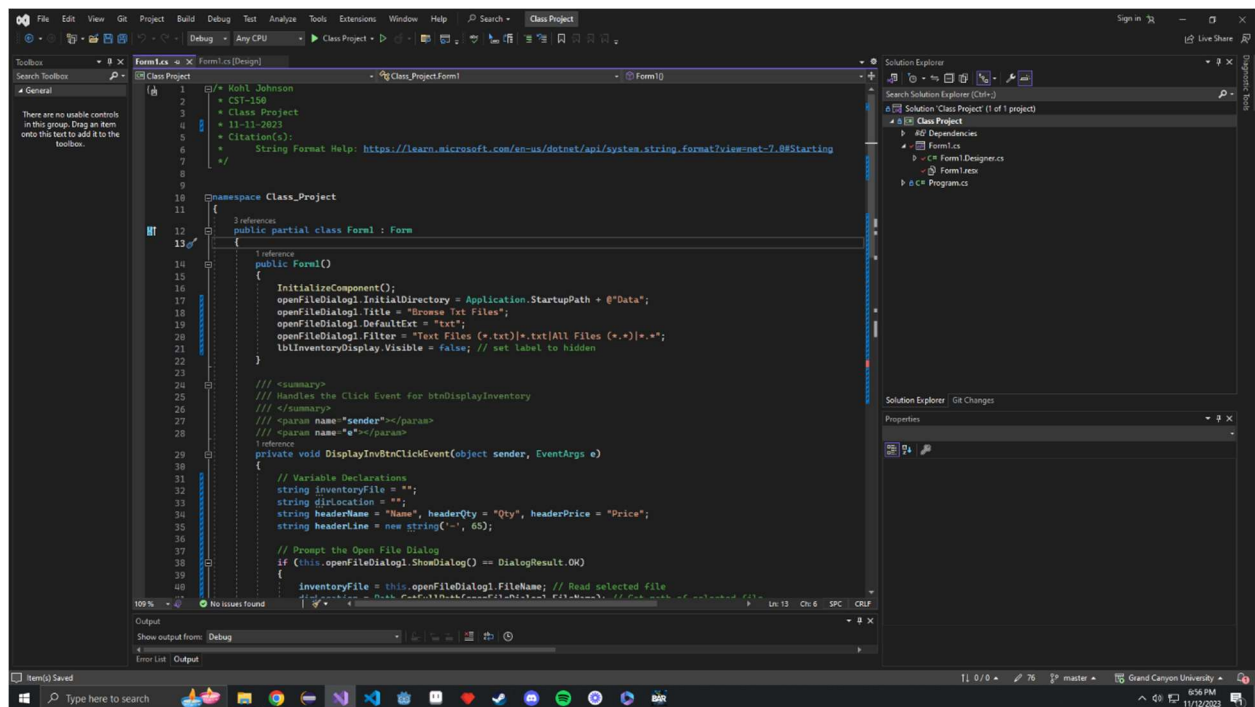

Finally got the format to line up. Realized it was because the “space” between the characters is different for each font/character in that font (thanks to the activity for pointing it out). Anyway, just displays the products from the `Inventory.txt` file.

## Inventory.txt Path Screenshot

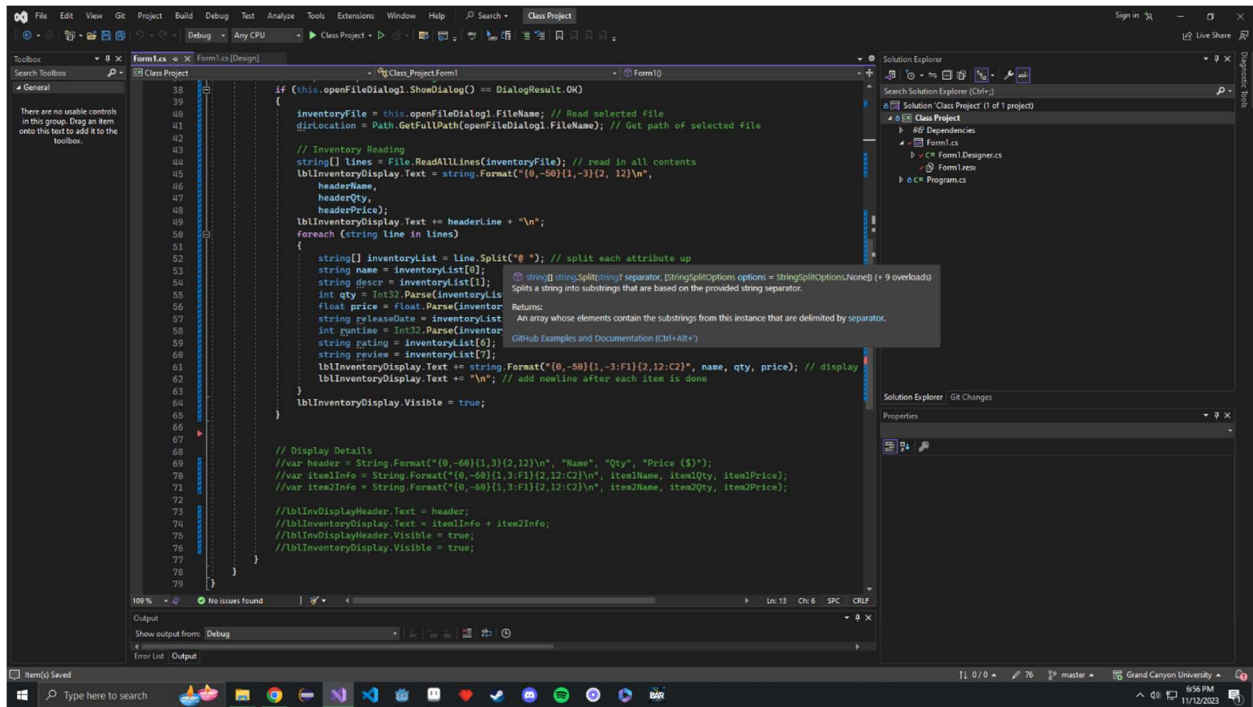

Just shows the path for the Inventory file.

## Code Screenshot 1

Shows the citation, select file dialog stuff, and the variable declarations.

## Code Screenshot 2

Shows the rest of the file which includes reading in the data from the text file, assigning those to correct variable, and Parsing the data that needs to be, like Integers and Floats.
